

Carbon Reduction Plan

Supplier name: LogiKal

Publication date: 2022

Commitment to achieving Net Zero

Logikal is committed to achieving Net Zero emissions by 2026.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
2019 Baseline year included the compilation of the business travelling part of our emissions, giving us a significant start to our emissions reduction. Due to COVID we decided to not continue to report on or compare against our figures until we determined a new level of 'normal' had been reached. Once this has been done the next steps will be taken to quantify our other areas of emission creating activities.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	(Direct) GHG emissions - 0
Scope 2	(Energy indirect) emissions: Not quantified yet, something we may aim to do in future.

Scope 3 (Included Sources)	<p>Upstream transportation and distribution: 0 Downstream transportation and distribution: 0</p> <p>Waste generated in operations: Not quantified yet, something we may aim to do in future.</p> <p>Employee commuting: Not quantified yet, something we may aim to do in future.</p> <p>Business travel:</p> <table border="0"> <tr><td>Air</td><td>2.47</td></tr> <tr><td>Bus</td><td>1.13</td></tr> <tr><td>Car (diesel)</td><td>3.72</td></tr> <tr><td>Motorcycle</td><td>2.24</td></tr> <tr><td>Train</td><td>3.38</td></tr> <tr><td>Tube</td><td>3.99</td></tr> </table>	Air	2.47	Bus	1.13	Car (diesel)	3.72	Motorcycle	2.24	Train	3.38	Tube	3.99
Air	2.47												
Bus	1.13												
Car (diesel)	3.72												
Motorcycle	2.24												
Train	3.38												
Tube	3.99												
Total Emissions	16.94												

Current Emissions Reporting

Reporting Year: 2019					
EMISSIONS	TOTAL (tCO_{2e})				
Scope 1	(Direct) GHG emissions - 0				
Scope 2	(Energy indirect) emissions: Not quantified yet, something we may aim to do in future.				
Scope 3 (Included Sources)	<p>Upstream transportation and distribution: 0 Downstream transportation and distribution: 0</p> <p>Waste generated in operations: Not quantified yet, something we may aim to do in future.</p> <p>Employee commuting: Not quantified yet, something we may aim to do in future.</p> <p>Business travel:</p> <table border="0"> <tr><td>Air</td><td>2.47</td></tr> <tr><td>Bus</td><td>1.13</td></tr> </table>	Air	2.47	Bus	1.13
Air	2.47				
Bus	1.13				

	Car (diesel) 3.72 Motorcycle 2.24 Train 3.38 Tube 3.99
Total Emissions	16.94

Emissions reduction targets

As a business, we are focused on reducing our carbon footprint as set out in our Sustainability Policy where possible and supporting initiatives to achieve net zero. In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 0 tCO₂e by 2026. This is a reduction of 100%

The following environmental management measures and projects have been implemented since the 2019 baseline and the measures will be in effect when performing the contract.

Each of our offices are now based in shared WeWork accommodation, which achieves carbon savings through heating and cooling a shared rather than a separate office environment. It also allows us to maximise opportunities for recycling waste and saving paper through utilising shared printing services.

An initiative due to be launched in July 2022 is a salary sacrifice Electric Vehicle scheme available to all our staff. After reviewing a number of potential suppliers, we specifically selected Octopus EV as a provider as they also offer an EV specific electricity tariff based on 100% renewable energy to EV customers. Each member of staff will be entitled to a fully electric vehicle through the scheme available for business and personal use, to reduce the use of fossil fuels, travel with zero carbon emissions and fully utilise 100% renewable based energy. This will have a direct reduction on the business travel emissions we have so far measured, and also the commuting emissions we plan to measure.

We also encourage our staff to adopt hybrid working arrangements post COVID with 2 days a week in the office. This not only achieves a better work life balance for our staff, but also reduces commuting miles each week, meaning without having the baseline figures our emissions for commuting will be comparatively low.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard

and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of LogiKal:

Tom Kent

Managing Director UK
