

## The LogiKal Difference

LogiKal is a specialist consultancy and the recognised global leader in project controls, enhanced business intelligence, and digital solutions.

Having supported and advised on many of the world's largest and most complex capital projects, we help you develop your teams, optimise project processes, and implement digital technologies that increase confidence and certainty in project outcomes.

**We use the latest digital technologies and industry best practice to transform the way you view and manage project performance data**

### How We Add Value

**Planning** – schedule management using P6, MS Project, Asta Projects to plan approach and monitor outcomes.

**Integrated Project Controls** – utilising holistic project reporting to provide a single source of truth for informed management decisions.

**Data Analytics** – adopting real time data tools such as Power BI to develop effective dashboards to identify key trends and report project progress.

**BIM Maturity Assessment**– provides a strategic analysis that identifies the current maturity and capability of BIM, cost, and schedule management within an organisation, and highlights potential areas for improving capabilities.

*With over two decades of expertise, LogiKal excels in delivering planning and controls solutions for major international projects. We possess a deep understanding of the complexities, necessary skills, and reporting/assurance demands essential for the successful execution of intricate ventures*

*Logikal is not only developing and monitoring our programme but applying state of the art planning methods such as 4D planning and is the key to integration between the programme and PowerBi.*

With a focus on collaboration, relationships and shared goals, our experienced team establishes your objectives, dependencies and success criteria to ensure a focused, consistent, effective approach to delivering your requirements

**Sydney Metro (\$50bn)** – LogiKal has a key role in the Sydney Metro Expansion Portfolio. It’s a critical program that delivers an integrated transport system throughout Sydney. LogiKal are providing PMO, Project Controls, Capability Development and Digital Services.

“  
*The planning and schedule support has provided us with boost in our controls which will allow us to much more easily address issues that appear on all projects*  
 ”

**JHG/Gamuda** - LogiKal was entrusted with the responsibility of tackling a complex problem within the scope of the Suburban Rail Loop project proposal. Our primary role involved offering their specialised knowledge in project planning, focusing on scheduling and program optimisation.

**Livingstone Shire Council** – LogiKal conducted an independent project management review of the \$47.2m Yeppoon Foreshore & Town Centre Revitalisation Project which resulted in a report compiling findings & recommendations highlighting the need for a project controls capability.

**Hong Kong Airport (\$141.5 bn)** – LogiKal was engaged to provide project controls and planning experts to augment the inhouse Airport Authority team for the Three-runway system (3R2) project. LogiKal expertise established relevant processes, procedures, and systems.

“  
 Every candidate placed by Logikal has been exceptional and I would highly recommend Logikal to anyone looking for a reliable and effective consultancy service. It is my preference to deal with this consultancy firm as they are truly the best in the business, and I look forward to working with them for many years to come  
 ”
